Eurovent launches new website

Brussels, 14 September 2023. Eurovent is pleased to announce the launch of its new, redesigned website. It features an enhanced user experience with access to exclusive member resources, latest policy updates and more.

The new website features a streamlined corporate look which caters for easy navigation and access to specific information. The primary goal during the redesign process was to create a more user centric experience and to focus more on easier accessibility of the required information by the user. Eurovent members can now have easy access to comprehensive industry information, meeting documentation, as well as upcoming meetings and other industry events on the new website.

The new website features a member-exclusive 'Policy Updates' section, where users can find up-to-date information on the latest policy developments affecting the HVACR industry, categorised accordingly in different topics. Visitors to the new website can stay informed on the latest Eurovent activities through our News and Press Releases, which will be regularly published in the NewsHub section.

Participants of any Eurovent group(s) will still have access to all their meeting files, related articles and documents, but in a much more radiant appearance. All Eurovent members now have the ability to view a streamlined design in the 'My Eurovent' section, where they can view all Eurovent working groups, upcoming meetings and events of groups they participate in. Members will also have access to resources and download Eurovent corporate documents such as the Eurovent logo files, Statutes and By-Laws and the Statement of Principles. The website will also be a base for bringing many more interesting features to our members in the future.

Following the website launch, the Eurovent Secretary General Francesco Scuderi stated: "Our members' needs were at the centre of concern during the process of redesigning the website. Hence the need to make the website intuitive to the user specific needs and navigation. We are certain that the new website will provide for an easy and exciting access. By attributing the enhanced user experience of the website, all our members can instantly access all the information they need, which will aid in providing valuable input to the HVACR sector."

For more information on Eurovent Association and to view the site, please visit www.eurovent.eu. If you have any questions or need further assistance with the new Eurovent website, please contact Ms Andrea Gasparova via andrea.gasparova@eurovent.eu or +420 775 770 332.

About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe represent more than 1.000 organisations, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn EUR, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level playing field for the entire industry independent from organisation sizes or membership fees.

Our Member Associations

Our Member Associations are major national sector associations from Europe that represent manufacturers in the area of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, and Industrial Ventilation technologies.

The more than 1.000 manufacturers within our network (Eurovent 'Affiliated Manufacturers' and 'Corresponding Members') are represented in Eurovent activities in a democratic and transparent manner.
