## Polish 'Indoor Climate 2030' Symposium thinks beyond HVACR

Eurovent Summit 2016 to host Polish symposium for trends and developments in building ventilation and air-conditioning

Krakow, 13 May 2016. As announced today by the organisers, the Polish 'Indoor Climate 2030' Symposium will be held during the 2016 **EUROVENTSUMMIT** on 28 September 2016. This event constitutes a hands-on, forward looking seminar for building consultants, contractors, designers, manufacturers, planners, and everyone else interested in upcoming developments concerning indoor climate (HVAC) technologies. It is being jointly organised by Eurovent, [Polish Ventilation Association](#), and [REHVA](#). The event follows the **EUROVENTSUMMIT**'s ideal of thinking 'Beyond HVACR'.

The 'Indoor Climate 2030' Symposium will be held entirely in Polish and includes seminars by leading experts such as Piotr Bartkiewicz and Agnieszka Sowa. Amongst others, participants are going to receive in-depth insights into European Union regulatory developments (Ecodesign, Energy Performance of Buildings), new testing and rating standards for ventilation equipment, performance certification programmes, and market development trends following Ecodesign Regulations.

*'With the Polish 'Indoor Climate 2030' Symposium, the upcoming **EUROVENTSUMMIT** in Krakow will be home to yet another highlight that provides everyone in Poland dealing with indoor climate technologies with a great added value', says Igor Sikonczyk, Market Manager at Eurovent. 'This event looks beyond HVACR, aiming to provide an outlook on latest and upcoming developments impacting our sector such as the new EN-ISO 16890 Standard that Eurovent is actively working on, the revision of the EU's Energy Performance of Buildings Directive, or the increasing relevance of Indoor Air Quality.'*

Detailed information and the confirmed schedule of the Polish 'Indoor Climate 2030' Symposium can be found at [www.eurovent-summit.eu](http://www.eurovent-summit.eu). Participants of this Symposium can also participate in all other events and activities of the 2016 **EUROVENTSUMMIT**. Updates are being provided on a frequent basis via email and [LinkedIn](#). As Official Carrier of the 2016 **EUROVENTSUMMIT**, [LOT Polish Airlines](#) offers all SUMMIT Pass holders to travel to Krakow with a 10% discount.

## About Eurovent

### Europe's Industry Association for Indoor Climate, Process Cooling, and Food Cold Chain Technologies – thinking beyond 'HVAC&R'

Eurovent is Europe's Industry Association for Indoor Climate, Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe, the Middle East and Africa represent more than 1.000 companies, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn Euros, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level-playing field for the entire industry independent from organisation sizes or membership fees.

Eurovent's roots date back to 1958. Over the years, the Brussels-based organisation has become a well-respected and known stakeholder that builds bridges between manufacturers it represents, associations, legislators and standardisation bodies on a national, regional and international level. While Eurovent strongly supports energy-efficient and sustainable technologies, it advocates a holistic approach that also integrates health, life and work quality as well as safety aspects. Eurovent holds in-depth relations with partner associations around the globe. It is a founding member of the ICARHMA network, supporter of REHVA, and contributor to various EU and UN initiatives.

### Our Members and 'Affiliated Manufacturers'

Our Members are national associations from Europe, the Middle East and Africa that are representing manufacturers in the area of Indoor Climate, Process Cooling, and Food Cold Chain technologies.

The more than 1000 companies within their networks (Eurovent 'Affiliated Manufacturers') can directly participate in Eurovent activities in a democratic and transparent manner.

## Our Corresponding Members

Manufacturers from EMEA countries, which do not yet have a national association Member within the Eurovent network. Examples include:

## Our Associate Members

Organisations that are engaged in activities related to the sectors the Eurovent association covers. Examples include:
