Register now for the 2018 Eurovent Summit in Seville

Final programme and early bird registration now available at www.eurovent-summit.eu

Brussels, Seville, 16 May 2018. The registration portal and final programme of the EUROVENTSUMMIT are now online. The 2018 edition of Europe's major gathering for key decision-makers in the area of Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies is going to take place from 25 to 28 September in Seville, Spain. It connects close to 500 industry leaders from Europe, the Middle East, Northern Africa, and international markets throughout around 40 seminars, meetings, and events. The EUROVENTSUMMIT again offers a unique side programme and experiences that go beyond the usual conference experience.

The 2018 **EUROVENTSUMMIT** is co-organised by the Eurovent Association, Eurovent Certification, Eurovent Market Intelligence, and the Spanish associations AFEC and AEFYT. Next to the Connectivity Leader [ebm-papst](#), the event is supported by more than 30 Spanish and international organisations. In line with current industry developments, this year's guiding theme is **#VivaLaConectividad**.

Alex Rasmussen, President of the Eurovent Association, states:

"Industry 4.0, the Internet of Things (IoT), smart appliances, data security, Life Cycle Cost. Considering these and related opportunities and challenges deriving from the ongoing digital and industrial revolution, we want our sector to share best practices and recent developments. Yet, #VivaLaConectividad involves much more than this. It is our approach to bringing sector representatives from close to 50 countries together in a truly inspiring Andalusian manner. Conferences were yesterday, the **EUROVENTSUMMIT** is today and will again offer some unique activities and locations that you should not miss."

After two successful editions of the **EUROVENTSUMMIT** in Berlin and Krakow, this year will see a particular focus on Southern European markets. Highlights include the [Eurovent Innovation/HUB at the Naval Museum](#), the 60th anniversary celebration of the Eurovent Association in a beautiful Andalusian Hacienda, a dedicated Workshop for Installers in Spanish by the Spanish federation [CONAIF](#), and the Spanish Industry Symposium organised by [AEFYT](#) and [AFEC](#) (in English and Spanish).

Tickets for the 2018 **EUROVENTSUMMIT** can now be purchased at www.eurovent-summit.eu – same as the last times, affordable and not-for-profit oriented.

About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe, the Middle East and Africa represent more than 1.000 companies, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn Euros, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level-playing field for the entire industry independent from organisation sizes or membership fees.

Eurovent's roots date back to 1958. Over the years, the Brussels-based organisation has become a well-respected and known stakeholder that builds bridges between manufacturers it represents, associations, legislators and standardisation bodies on a national, regional and international level. While Eurovent strongly supports energy-efficient and sustainable technologies, it advocates a holistic approach that also integrates health, life and work quality as well as safety aspects. Eurovent holds in-depth relations with partner associations around the globe. It is a founding member of the ICARHMA network, supporter of REHVA, and contributor to various EU and UN initiatives.

Our Members and 'Affiliated Manufacturers'

Our Members are national associations from Europe, the Middle East and Africa that are representing manufacturers in the area of Indoor Climate, Process Cooling, and Food Cold Chain technologies.

The more than 1000 companies within their networks (Eurovent 'Affiliated Manufacturers') can directly participate in Eurovent activities in a democratic and transparent manner.

For in-depth information and a list of all our members, visit www.eurovent.eu

Democratic decision-making

DEMOCRATIC DECISION-MAKING

- 

Activities rest upon democratic decision-making procedures between members and their representatives
- 

'Umbrella association' structure ensures broad and truly credible representation of our industry vis-à-vis policy makers
- 

Voting rights independent from amount of membership contributions or company sizes
