CEIS is Connectivity Partner of the 2018 Eurovent Summit

High-end HVACR equipment laboratory highlights connectivity approach

Brussels, Madrid, 5 July 2018. For the second edition in a row, laboratory CEIS (Testing, Innovation and Services Center or centro de ensayos, innovación y servicios) has become the official Connectivity Partner (sponsor) of the 2018 Eurovent Summit in Seville, Spain.

The Spanish company is focused on providing the best technical testing solutions in fields such as air conditioning and heat pump appliances, electric cables, thermal insulation materials or plastic pipes since 1999. It is going to share its expertise during this year's Summit, taking place from 25 to 28 September. The Madrid-based laboratory will also be main partner of the Summit's "Who wants to be a climate millionaire?" event, where the moderator Ms Maxiline Tamko is going to ask questions about the industry, its legislative environment, the Spanish region, and most recent digital developments.

Mr Federico Muñoz Sanchez, Technical Commercial Director at [CEIS](#) reported:

"Since its first edition in 2014, we have been strongly supporting the **EUROVENTSUMMIT**, which has meanwhile evolved into Europe's major gathering for our industry. As CEIS is developing towards a more global approach and connectivity between all HVACR solutions and buildings, so is Eurovent. Next to this, we appreciate the networking value of the Summit. On the Tuesday evening, we invite you to a challenging event at Club Abril of the Hotel Melia Lebreros."

This year's Eurovent Summit will see a particular focus on Southern European markets. Next to the 'Who wants to be a climate millionaire?' event, highlights include the [Eurovent Innovation/HUB at the Naval Museum](#), a dedicated Workshop for Installers in Spanish by the Spanish federation [CONAIF](#), and the Spanish Industry Symposium organised by [AEFYT](#) and [AFEC](#) (in English and Spanish).

Tickets for the 2018 **EUROVENTSUMMIT** can now be purchased at www.eurovent-summit.eu – same as the last times, affordable and not-for-profit oriented.

About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe, the Middle East and Africa represent more than 1.000 companies, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn Euros, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level-playing field for the entire industry independent from organisation sizes or membership fees.

Eurovent's roots date back to 1958. Over the years, the Brussels-based organisation has become a well-respected and known stakeholder that builds bridges between manufacturers it represents, associations, legislators and standardisation bodies on a national, regional and international level. While Eurovent strongly supports energy-efficient and sustainable technologies, it advocates a holistic approach that also integrates health, life and work quality as well as safety aspects. Eurovent holds in-depth relations with partner associations around the globe. It is a founding member of the ICARHMA network, supporter of REHVA, and contributor to various EU and UN initiatives.

Our Members and 'Affiliated Manufacturers'

Our Members are national associations from Europe, the Middle East and Africa that are representing manufacturers in the area of Indoor Climate, Process Cooling, and Food Cold Chain technologies.

The more than 1000 companies within their networks (Eurovent 'Affiliated Manufacturers') can directly participate in Eurovent activities in a democratic and transparent manner.

For in-depth information and a list of all our members, visit www.eurovent.eu

Democratic decision-making

DEMOCRATIC DECISION-MAKING

- 

Activities rest upon democratic decision-making procedures between members and their representatives
- 

'Umbrella association' structure ensures broad and truly credible representation of our industry vis-à-vis policy makers
- 

Voting rights independent from amount of membership contributions or company sizes
