## Eurovent joins Cool Coalition

### Association aims to boost global ambition of sustainable cooling for all

**Brussels, 20 April 2021. Eurovent has become a member of the Cool Coalition, a global initiative led by the UN Environment Programme. The initiative aims to promote access to efficient, climate-friendly cooling for both industrialised and developing countries. Eurovent joins the network of more than 100 partners to help achieve better standards and regulations across the globe in support of the Coalition's objectives.**

[Cool Coalition](#) members are collaborating on science, policy, finance, and technology to meet growing demands for cooling in the context of rising climate ambition. It brings together governments, cities, international organisations, businesses, finance, academia, and civil society groups, engaged in knowledge exchange, advocacy, and joint action towards a rapid global transition to efficient and climate-friendly cooling.

Mr Felix Van Eyken, Eurovent Secretary General: "The demand for cooling and refrigeration will rise exponentially over the coming decades. We must ensure fair and equal access to it while concentrating on reducing its carbon footprint. As an industry association, Eurovent has long been involved in the development of better standards and regulations at European level, strongly supporting energy efficiency measures and the transition to low-GWP refrigerants. It is our commitment to support a global approach to sustainable cooling and we look forward to actively cooperate with other Cool Coalition members."

Ms Lily Riahi, Cool Coalition Coordinator at UNEP: "To put the cooling sector on a path to net-zero emissions, we need everyone on board. The Cool Coalition is thrilled to welcome Eurovent among its members. Together, we can transform the sector and put it on a path to decarbonisation, in line to global climate targets and sustainable development goals."

Cooling and refrigeration equipment supports critical infrastructure in the healthcare, food cold chain, IT and building sectors notably. It enables the production, transportation and storage of pharmaceuticals and food, replenishes and conditions the air in hospitals and grocery stores, and ensures the operation of data centres and telecommunication infrastructure.

The Cool Coalition is a global multi-stakeholder network that connects more than 100 actors to facilitate knowledge exchange, advocacy and joint action towards a rapid global transition to sustainable cooling. Led by UNEP, the Cool Coalition is one of the official outcomes and 'Transformation Initiatives' put forward by the Executive Office of the Secretary-General for the UN Climate Action Summit in New York.

## About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe represent more than 1.000 organisations, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn EUR, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level playing field for the entire industry independent from organisation sizes or membership fees.

## Our Member Associations

Our Member Associations are major national sector associations from Europe that represent manufacturers in the area of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, and Industrial Ventilation technologies.

The more than 1.000 manufacturers within our network (Eurovent 'Affiliated Manufacturers' and 'Corresponding Members') are represented in Eurovent activities in a democratic and transparent manner.
