Webinar on Energy Efficiency of AHU's in hot and humid climates Brussels, Paris, Dubai, 19 April 2022. Eurovent, in cooperation with Eurovent Middle East and Eurovent Certita Certification invites you to a webinar to discuss the energy efficiency of Air Handling Units in hot and humid conditions. The webinar will be aired internationally on 28 April 2022.

As a crucial part of a cooling and ventilation system, Air Handling Units can be built to a multitude of customer specifications and operating environments. Since January 2022, Eurovent has mandated its certified manufacturers to disclose the energy ratings for hot and humid climates when the products are sold in such environments.

In reaction to mounting requests to adjust energy ratings to local climates, Eurovent and its certification subunit Eurovent Certita Certification have developed an energy rating for hot and humid conditions. Aside from such ratings for chillers and VRF systems, the use of a separate energy label for Air Handling Units which operate in such climates, require a deeper look to understand implications and underlying operating principles.

To provide the technical background and an overview of the new energy label, Eurovent, in cooperation with Eurovent Middle East and Eurovent Certita Certification will host a dedicated joint webinar on 28 April 2022, addressing the following topics:

- Eurovent's energy label for hot and humid climates: Programme origin and methodology
- Energy efficiency in hot and humid conditions: Expert assessment and analysis
- Technical panel discussion

The webinar will be concluded with a dedicated Q&A session, where participants are invited to discuss any issues related to the topics. Register now and be a part of the **'Energy Efficiency of Air Handling Units – Hot and Humid Climates' webinar**. The webinar will be aired internationally on **28 April 2022** with the following timing:

- **Europe and North Africa: 08:00-09:30h (Brussels, Cairo)**
- **Middle East: 09:00-10:30h (Riyadh), 10:00-11:30h (Abu Dhabi)**
- **India: 11:30-13:00h (New Delhi)**
- **Southeast Asia: 14:00-15:30h (Singapore)**

Registration is free-of-charge [via this link](#).

About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe represent more than 1.000 organisations, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn Euros, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level playing field for the entire industry independent from organisation sizes or membership fees.

Our Member Associations

Our Member Associations are major national sector associations from Europe that represent manufacturers in the area of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, and Industrial Ventilation technologies.

The more than 1.000 manufacturers within our network (Eurovent 'Affiliated Manufacturers' and 'Corresponding Members') are represented in Eurovent activities in a democratic and transparent manner.
