## **Eurovent publishes updated version of 14/6 Recommendation**

**Brussels, 28 March 2022. The Eurovent Product Group 'Commercial Refrigeration Equipment' (PG-RDC) has published an updated version of the Recommendation 14/6 – 'Interpretation of Regulation (EU) 2019/2018 and of Regulation (EU) 2019/2024'.**

The updated version comes after one year of the Ecodesign and Energy Labelling requirements for refrigeration appliances with a direct sales function entering into force. The updated version, which provides interpretation of the Ecodesign and Energy Labelling measures, comes with the addition of standard configurations of remote vertical open roll-in cabinets and a Frequently Asked Questions (FAQ) section with answers to 69 in-depth questions concerning the interpretation of the Regulation (EU) 2019/2018 and the Regulation (EU) 2019/2024.

Maurizio Orlandi, Intellectual Property and Technical Compliance Group Manager at Epta and the Chairman of the Eurovent Product Group 'Commercial Refrigeration Equipment', states: "The current update of the 14/6 Recommendation further interprets the Regulation (EU) 2019/2018 and the Regulation (EU) 2019/2024 by elaborating, with the use of the FAQ section, on matters that required further explanation from manufacturers. This will certainly help in quickly achieving the energy saving targets proposed by the Commission."

Francesco Scuderi, Deputy Secretary General of Eurovent, continues: "One year after the entry into force of the Ecodesign and Energy Labelling requirements for refrigerating appliances with a direct sales function, an update of the Eurovent Recommendation 14/6 was much needed. The newly introduced FAQ section will provide both manufacturers and MSAs with an additional support and will help to ensure the level playing field."

This document was prepared in a joint effort by participants of the Eurovent Product Group 'Commercial Refrigeration Equipment' (PG-RDC), which represents a vast majority of all manufacturers of these products active on the EMEA market. The document can be downloaded free of charge in the Eurovent [Document Library](#).

## About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe represent more than 1.000 organisations, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn EUR, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level playing field for the entire industry independent from organisation sizes or membership fees.

## Our Member Associations

Our Member Associations are major national sector associations from Europe that represent manufacturers in the area of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, and Industrial Ventilation technologies.

The more than 1.000 manufacturers within our network (Eurovent 'Affiliated Manufacturers' and 'Corresponding Members') are represented in Eurovent activities in a democratic and transparent manner.
