ABB becomes Eurovent's Corresponding Member

Brussels, Zürich 01 March 2022. Eurovent extends its welcome to ABB, one of the leading manufacturers of HVACR drives, motors and controls, as its newest Corresponding Member. The membership was approved during the Eurovent Board of Directors meeting in February 2022.

ABB is one of the global leading manufacturers of drives, motors and controls for HVACR applications with a global footprint, supporting the industry across the world with products and services. Since its foundation more than 130 years ago, it has been highly focused on sustainable solutions and energy efficiency and is at the forefront of the digital revolution of most cities and infrastructure. ABB has committed to being carbon neutral by 2030 on all of its four businesses which are electrification, process automation, motion and robotics and discrete automation.

Frank Taaning Grundholm, ABB's Vice President of Global HVACR Sales who also serves as a Board member of Eurovent and Eurovent Middle East, remarked: "To get the most out of an HVACR system requires smart planning, and the most critical focus for building operators is to move towards specifying needs rather than technical solutions only. We are excited to be part of Eurovent and look forward to taking even more active part in its dialogues that are guiding the development of HVACR products in a more sustainable direction and leading important advocacy for improved Indoor Air Quality."

Is your organisation interested in becoming a member of our globally known industry association? All relevant information is available at www.eurovent.eu. In case of any questions, contact the Eurovent Team via secretariat@eurovent.eu.

About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe represent more than 1.000 organisations, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn EUR, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level playing field for the entire industry independent from organisation sizes or membership fees.

Our Member Associations

Our Member Associations are major national sector associations from Europe that represent manufacturers in the area of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, and Industrial Ventilation technologies.

The more than 1.000 manufacturers within our network (Eurovent 'Affiliated Manufacturers' and 'Corresponding Members') are represented in Eurovent activities in a democratic and transparent manner.
